Education

University of California, Irvine

Computer Science · Undergraduate, in progress

Focus

Applied AI / Software systems / Interactive experiments

Along the way

Baheal Pharma Group

Intern / 2026

Developed and iterated a complete WeChat mini-program client, integrated applied AI, and worked on frontend modernization, backend integration, and data consistency.

Baidu / Xiaodu

Intern / 2025

Worked on automation, data pipelines, experiment tooling, and system validation.

Selected projects

GoldenCamp

In development

A four-player gold-mining prototype exploring cooperation, private discoveries, and playful betrayal.

Context-aware AI

Internship project

Connecting structured summaries and follow-up questions through shared, carefully scoped context.

Yunxinyi

Internship project

Building and iterating a complete patient-facing mini-program client, from authentication to records and reports.

ML Research Pipeline

Research prototype

A research pipeline for time-aware model evaluation, backtesting, and execution-oriented experiments.

Admin Modernization

Internship project

Modernizing an administrative interface while integrating with an existing backend and permission model.

Registry Integrity

Internship project

Improving record integrity through consistent validation, edit handling, and soft-delete-aware logic.

Tools & technologies

TypeScript, Python, C#, Unity, Vue, WeChat Mini Program, Coze Workflow, FastAPI, Java / Spring, MySQL, Redis, LEAN
